Efir Ecosystem Bounty Program

Bounty ends when the ICO is over. The Bounty pool accounts for 3% of the total number of QZ tokens issued. Therefore, when the hard cap is reached the Bounty pool will account for 3 mln QZ tokens (513.75 ETH). Bounty pool is distributed as follows:

66.7% (2M QZ)
Bounty for YouTube bloggers and media

33.3% (1M QZ)
Bounty for community

General rules of the bounty campaign

In order to participate in the campaign, you must fulfil one or several requirements described below (you can participate in several categories, the rewards will be added together). It is not allowed to delete messages, reposts or retweets or otherwise it will count as abolishing the requirements. Bounty tokens will be transferred to the ETH wallets of participants after the ICO is finished. Each participant will have to register on the website.

Main objectives / targets of the Bounty

Attract new users to the project and increase brand awareness.

Community Growth. Growing the amount of market members who use services of Efir.io

Bounty for community
